A Small Article

Grace Hopper

1 Summary

This fixture mixes the elements of a short article: sections, a list, a table, a formula, code and a quotation.

2 Data

The measurements were taken on three machines:

- an older laptop,
- a desktop computer,
- and a small server.

Machine	Seconds
Laptop	4.21
Desktop	2.08
Server	1.57

3 Model

The time grows with the number of lines n as

$$t(n) = an + b \log n,$$

which fits all three machines.

4 Code

```
let t = a * Double(n) + b * log(Double(n))
```

> Measure twice, typeset once.
